

Surface Protection - Product Code: Stainless Steel Step Over Bench KSOB1300

Product Specification:

- Suitable for cleanroom, sterile rooms, food processing and research areas
- Rounded edges ensure no dirt traps
- Adjustable feet
- Integrated Storage

Product Dimensions:

Reference	Height	Width	Depth
KSOB1300	450mm	1300mm	300mm
KSOB1500	450mm	1500mm	300mm
KSOB1800	450mm	1800mm	300mm

Options:

Stainless Steel Grade	Finish	Thickness	Storage
304	Satin Finish 320 Grit Polished	2mm	None
316	Electropolished	3mm	One Sided shoe storage
	Bead Blasted		Double sided shoe storage
	Bead Blasted & Electropolished		
	320 grit polished & Electropolished		
	Powder Coated		

Overview:

The Kent Stainless step over benches are designed act as a barrier preventing access into cleanroom areas. The bench also allows personnel to easily change their “dirty” footwear before entering the cleanroom area.

The freestanding benches have adjustable feet and can incorporate storage for footwear.

Maintenance:

Stainless Steel:

Clean the stainless steel components using warm water with a mild detergent with a non abrasive cloth or sponge. Heavier stains may require the use of a nylon scouring pad or a stainless steel cleaner. To remove paint or graffiti (or light concrete splashes) use a cloth and alkaline or solvent paint strippers according to type of paint.

For Satin Finish Stainless try to follow the direction of the grain when cleaning vigorously or polishing. For Bead Blasted Finish use a circular motion.

Rust spots or 'tea stains' can occur on the surface of the material, these are normally caused by contamination from ordinary mild steel, particularly in areas where construction work has been undertaken.

Where contamination of the stainless has occurred from ordinary mild steel coming into contact with the stainless, use Rust Remover 410. In cases where the surface is severely stained as a result of severe environmental conditions or scratched due to misuse, it may still be possible to restore the original finish using chemicals such as Oxalic Acid solution. There are many stainless steel polishes available to enhance the surface finish. We recommend [Mister Stainless Ltd.](#) as a provider for stainless steel cleaning products
